Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 44-60 and 83, drawn to method of thermal analysis.

Group II, claim(s) 61-75, and 80-82 drawn to a program for thermal process.

Group III, claim(s) 76-79, drawn to thermal process apparatus.

2. The inventions listed as Groups I, II and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The method, the apparatus and the program for thermal analysis for determining a heating characteristics value based on heating temperature and heating time at any measured point which are the common features of the group of inventions is known from US Patent No. 4927068. Thus claims 44, 61 and 76 are either obvious over or anticipated by US Patent No. 4927068 accordingly, the special technical feature linking the two inventions, thermal analysis for determining a heating characteristics value based on heating temperature and heating time at any measured point, does not provide a contribution over the prior art, and no single general concept exists. Therefore, restriction is appropriate.

3. If the applicant elects group I, applicant must additionally elect the follow:

This application contains claims directed to the following patentably distinct species of the claimed invention:

- la. Claims 44-53, drawn to thermal analysis by single location.
- lb. Claim 83, drawn to cooling characteristic
- lc. Claims 54-60, drawn to thermal analysis by a plurality of locations

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
